FOURSURE™
by LiveEnsure®

THE PROBLEM.

EVERY DAY

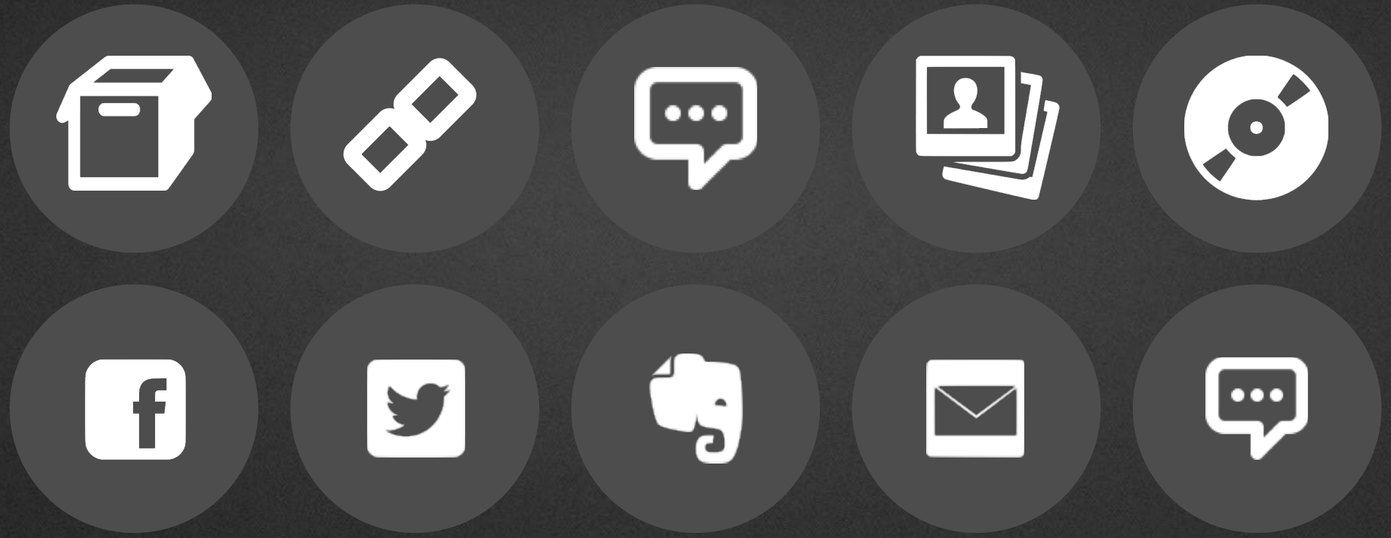
5B Mobile/Social Users

10B Bits of Content

20B Text Messages

30B Chat Messages

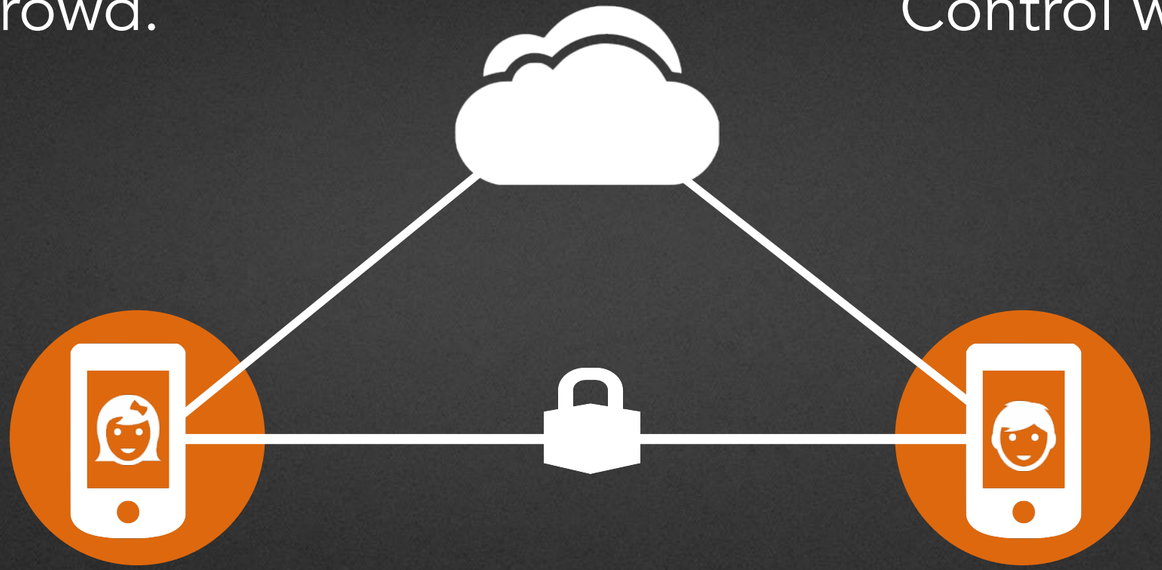
All kinds of **content**. All kinds of **channels**.



But how do you?

Trust your crowd.

Control what you share.



All peer to peer.

That's why we created **FourSure**.

A simple **app** for users to verify **anyone** and secure **anything** they share.

Anyway and **anywhere** they share it.

FourSure verifies and secures via location, behavior, knowledge & time….

…time, biometrics, wearables and more.

From an App on iOS, Android and Windows mobile devices

Or a single developer API.

All with just a tap.

HOW IT WORKS.

Tap content on device.

FourSure can secure any link, content or anything in your clipboard.

FOURSURE

Choose a trust factor.

Pick from devices, location, behavior, knowledge…

FOURSURE

Paste content to share.

Just share it like you would anything, anywhere…

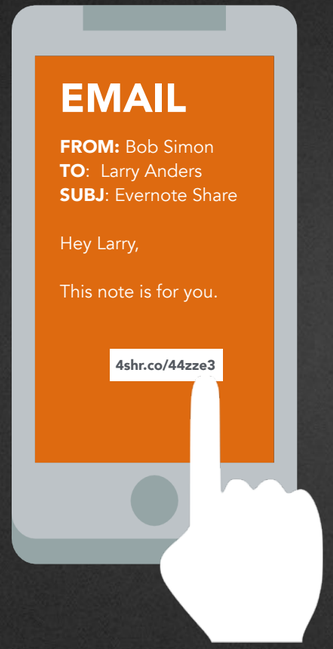
ie. social, storage, email, text message, chat.

FOURSURE

Content goes over the cloud.

Sent, hosted or posted.

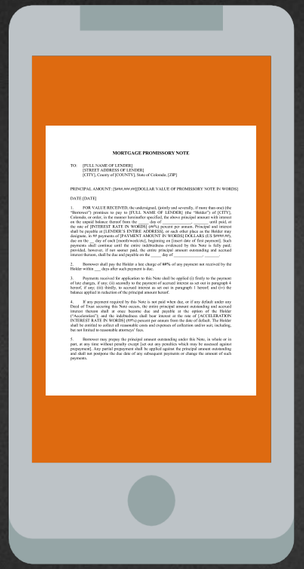
FOURSURE



Receiver taps share.

Right where you shared it with them.
No new networks or channels.

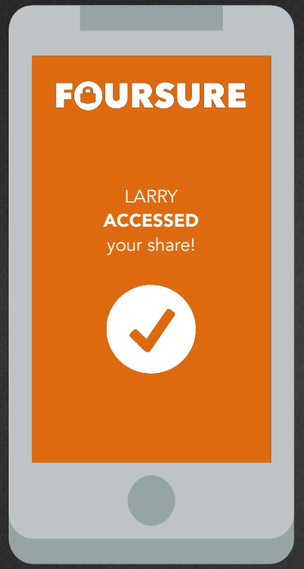
FOURSURE



User is verified, content secured.

FourSure automatically verifies the complete context of user, share, device and security factors.

FOURSURE



Sender is notified.

With real-time ability to modify, delete or update share.

YES NO

FOURSURE

FourSure is the power to:

who is on the other end

your **privacy** online

any **content** you share

peer to **peer.**

All with just a tap.
