*Connected health platform,
providing immediate virtual
healthcare services.*

A highly reliable and secure platform for providers and caregivers to offer virtual health services to patients anytime, anywhere and from any device.

The **VirtuMedix** platform offers an unprecedented suite of features enabling virtual interactions between clinicians, caregivers, patients, and family members. Leveraging decades of experience in producing reliable, secure and innovative mobile technology, TCS has created a robust and scalable platform allowing more people easy access to health practitioners and their services. **VirtuMedix** helps organizations achieve greater efficiency with our cost effective platform and streamlined workflows.

Deploying **VirtuMedix** can help organizations:

- Augment their current services by adding virtual consultations and follow-up meetings while increasing their patient reach.
- Increase patient satisfaction scores (HCAHPS) by providing immediate health services any time from anywhere.
- Improve HEDIS scores by capturing data otherwise lost during the variety of brick and click encounters, helping to improve system-wide quality indicators.

VirtuMedix enables immediate virtual healthcare to patients from their home, office or when traveling. It helps patients avoid long waits in hospitals or other urgent care clinics while avoiding expensive and overburdened venues like the emergency rooms.

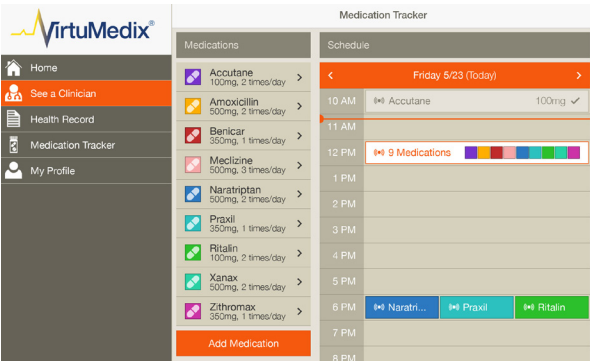

Rapid technological development is driving healthcare to a more patient-centered, virtualized and mobile world. With our advanced Connected Health TeleHealth solution, users can reduce patient costs, increase access to quality medical care, cope with changing reimbursement models, and simultaneously provide more personalized patient care.

VirtuMedix advantages include:

- Secure, reliable, and scalable virtual Connected Health platform accessible from personal computers, tablets, smartphones and traditional telephones.
- Cost-effective medical and health service delivery with live multi-lingual patient care agents.
- Interoperability among variety of systems including ePrescribe, EHRs, and billing systems.
- Location services to aid practitioners, caregivers, family members to locate and notify patients.
- Navigation services to provide turn-by-turn directions to nearby medical and other healthcare facilities.

Benefits

- Reduce hospital readmissions
- Decrease frequency of ER visits
- Improve patient satisfaction
- Facilitate post-surgery follow up

Benefits

- Mobile
- Secure
- Accessible
- Personalized
- Interactive
