

# Disaster recovery is a growing priority

63% of SMBs globally consider disaster recovery or business continuity to be a critical priority.

Source: Forrester/disaster recovery

**DOWNTIME  
COSTS BUSINESS  
\$2 BILLION  
IN LOST REVENUE  
A YEAR**

.....

**Customers expect 100% uptime, let's give it to them by making downtime a thing of the past**

We provide a complete business continuity solution that includes all of the necessary equipment as well as pooled, cellular data. In the event of an outage, the hardware will convert the cellular data to Ethernet and seamlessly failover to 3G/4G network connectivity.

# Why partner with Wyless?

## Partnering for success

As a partner or a reseller of Wyless, you will have the ability to offer your customers the same portfolio of failover solutions that we offer to our customers. Through our cloud-based management platform, Porthos™, you will be able to monitor your customers connections – enabling you to run customizable reports that can be generated by connection, IP address, account or device. These features help you to monitor and invoice your customers accordingly.

## Flexible options aligned to individual customers needs

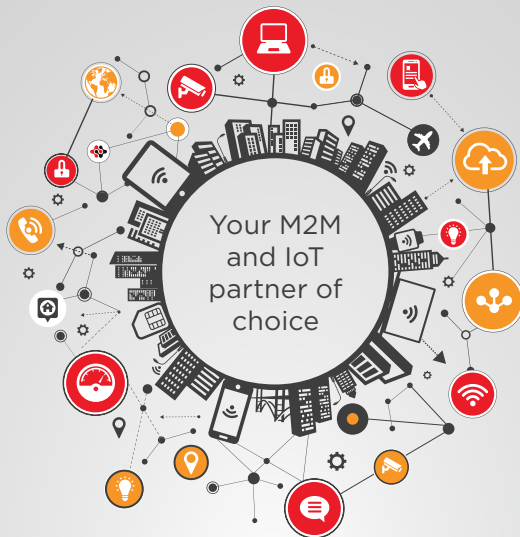

Wyless has established partnerships with the leading names in hardware manufacturing, (CradlePoint, Digi, Sierra Wireless, Cisco, etc.) as well as the most well-known mobile network operators (Verizon, AT&T, T-Mobile, Sprint). Wyless uses its buying power to offer flexible options through a one-stop shop providing cost effective failover solutions while addressing all business problems.

## Our commitment

### We take your security seriously

We have implemented the most stringent security policies and robust encryption at every level.
