

# Concerned about the 2G sunset – talk with the experts at Wyleless

## **Sunset of 2G networks**

The '2G sunset' as it is referred to, is a simple story of supply and demand. As global data traffic continues to increase at an exponential rate, MNO's must adopt more spectrum-efficient protocols, such as 3G and 4G LTE. The networks used for 2G technologies must now be re-allocated to support the rapid growth of LTE. All MNO's in the US have plans to take down their 2G networks in the future, though all have different timelines for the 2G retirement.

## **The implications**

While the move away from 2G will be great for companies requiring higher bandwidth connections, it could be quite disruptive for traditional M2M customers utilizing low data, low speed 2G connections. These companies generally do not require the speed that comes with LTE, nor do they have the available capital to fund it. The 2G sunset will be a bump in the road for many M2M companies with existing 2G connections, but it will by no means be the end of the road. There are several migration options available to these businesses.

## Why Wyleless is the best partner to guide you through this transition

### Our promise to you

Our Sales Teams and Support Teams have been extensively trained to ensure our customers' 2G migrations are as smooth and efficient as possible. With 3 Tiers of Support, our dedicated reps are available to answer your call 24/7/365 providing a truly unrivalled support experience.

### Network options

Wyleless has offerings for both of the dominant methods of wireless technologies used in the United States: GSM and CDMA. Regardless of your preference, we can accommodate 2G, 3G, and LTE solutions across both types of wireless solutions.

### Competitive rates

In lieu of the looming 2G shut downs, Wyleless has been hard at work negotiating the most competitive rates possible with MNO's. As a result, we have the ability to offer industry leading rates on over 300 networks across the globe.

### Integration made easy

With integration into 20 of the world's largest MNO's, Wyleless has the ability to select the carrier of your choice. With Porthos™, Wyleless' cloud-based management platform, you have a single window into whichever service you choose without having to re-integrate your systems.

### End-to-end solutions

In addition to supplying our customers with the sales expertise, customer support, and connectivity solutions needed for their 2G migration, Wyleless also offers a wide variety of M2M devices via our e-commerce store. Wyleless represents the leading names in hardware manufacturing and offers the leading 3G and LTE accessories necessary to complete your IoT solutions.

### About Wyleless

We empower businesses to realize the full potential of the Internet of Things (IoT). Our unparalleled reach is delivered through our 20+ MNO partners across the globe. We connect millions of devices around the world with our leading technology, providing guaranteed costs, visibility and control of customer mission critical applications. We offer eSim, Multi-IMSI, and Core Multiple Network capabilities deployed through Virtual Data Centres in several countries and our impartial experts and collaborative team help our customers succeed in their businesses. Our comprehensive services deliver 24/7/365 support and monitoring of customer devices through our global service centres.
